

# Tea Light Cover Peyote Round Instructions

Designs by Diane Masters

Each tea light cover pattern is made up of identical **Sections**. The **Section Chart** represents one Section only. Each row in the pattern will repeat by the number of sections in the pattern. See the free attached pattern (page 3) for the bead count chart.

## READING THE SECTION CHART

Follow the Section Chart rows in the order from “bottom to top”. The bottom row is the Base Row (Row 1) and the top row is Row 20.

The Section **Base Row** beads should be picked up in the order “**left to right**” starting from the bottom left corner. The order of the beads is very important! A **Full Base Row** is the complete base row on the tea light container and will always be 96 beads. It is calculated as follows:

$$\text{Full Base Row} = \text{Number of beads in the Section Chart base row} \times \text{Number of Sections}$$

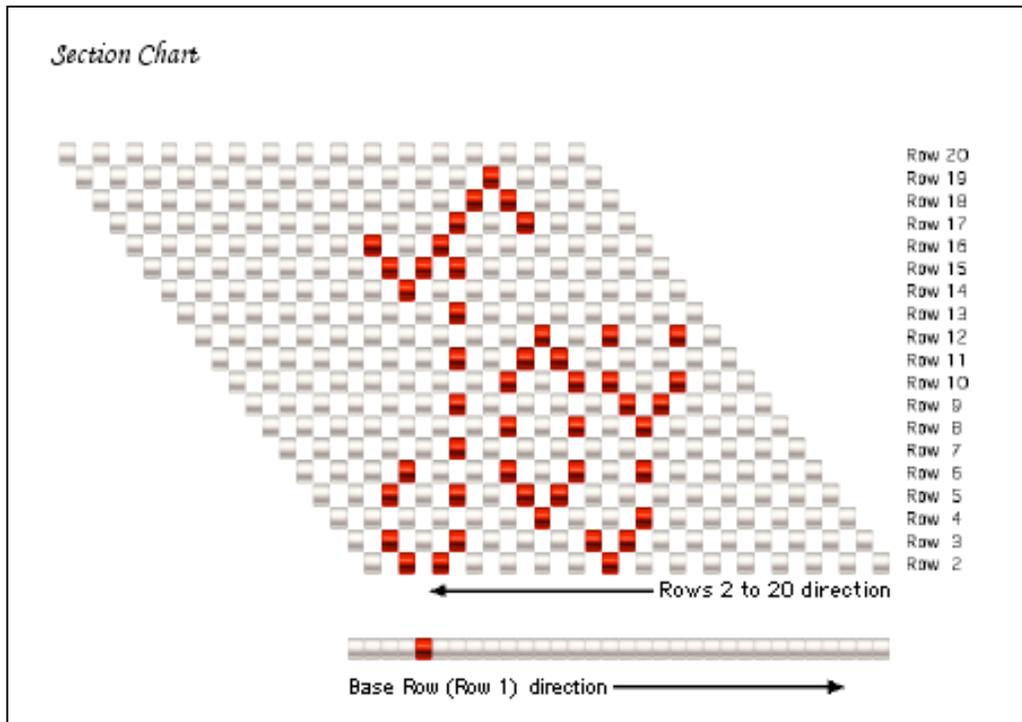

In our example, 36 beads in the Section Chart base row  $\times$  3 Sections in the chart = 96 beads.

Section **Rows** are all the other rows above the Section Base Row. A **Full Row** is a complete row on the tea light container and will always be 48 beads. It is calculated as follows:

$$\text{Full Row} = \text{Number of beads in the Section Chart} \times \text{Number of Sections}$$

In our example, 16 beads in the Section Chart row  $\times$  3 Sections in the chart = 48 beads

The row beads are picked up in the order “**right to left**”. The order of the beads is very important!

## PEYOTE ROUND STITCH - STEP BY STEP

1. Thread your needle with 90 inches of conditioned cotton thread. Pick up each of the beads for the Section Base Row (Row 1) starting from the bottom corner **left** bead.

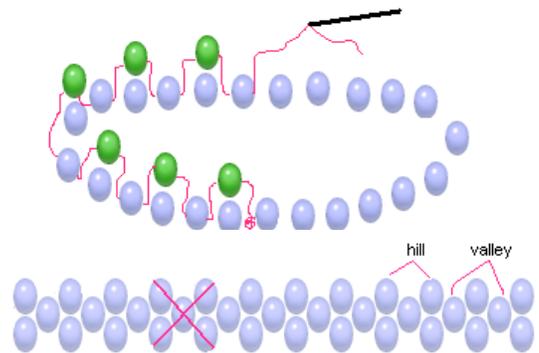

Repeat this step by the number of Sections to complete the full base row. In our example, there are 3 Sections, so repeat this step 3 times. The total number of base row beads will be 96.

2. Wrap the beads around the tea light plastic container in a circle, and tie a square knot leaving a 5 inch tail.

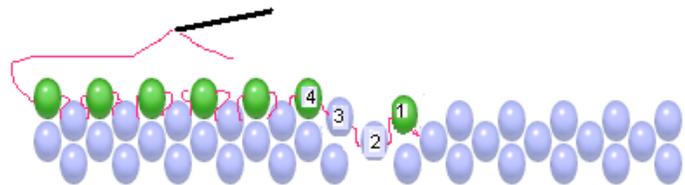

3. Pick up the first bead from the **right** side of the Section Chart for Row 2. Skip a bead and put the needle through the 2nd bead on the base row. Pick up the next bead from the chart. Skip the next bead and put the needle through the 4th bead. Give a gentle "tug" and the bead will form an "X". You will notice that the beads look like a series of X's with "hills" and "valleys".

Repeat this step by the number of Sections to complete one full row. In our example, there are 3 Sections, so repeat this step 3 times (48 beads).

4. When the last bead for the Row 2 is added (green bead #1), bring your needle through both the next bead (blue bead #2) and the first bead added of Row 2, which is the first "hill" you created (blue bead #3). Pick up the first bead for Row 3 (green bead #4). Remember we read the rows from right to left. Bring your needle through the next bead (the "hill" bead). Again, give the bead a gentle "tug" and it will fit into the "valley". Continue for each bead in the Section Chart for Row 3.

Repeat this step by the number of Sections. For example, if there are 3 Sections, in the pattern repeat this step 3 times (48 beads).

5. Steps 3 and 4 are repeated for each row. Weave both the ending thread and the starting tail into the beads. Enjoy!
